First-Time Home Buyer Five Common Mistakes

- 1. They do not ask enough questions of their lender and end up missing out on the best deal.**
- 2. They do not act quickly enough to make a decision and someone else buys the house.**
- 3. They do not find the right agent who is willing to help them through the home buying process.**
- 4. They do not do enough to make their offer look appealing to a seller.**
- 5. They do not think about resale before they buy. The average first-time buyer only stays in a home for four years.**
